SUMMARY:

Software Developer with 6 years of experience specializing in C# and .NET Framework. Skilled in designing, developing and maintaining web applications, APIs, and backend systems. Passionate about solving business problems through technology, with hands-on experience in PHP, GraphQL, Vue.js and full-stack development. Known for strong problem-solving, critical thinking and a collaborative mindset in Agile development environments.

SKILLS:

- **Languages & Frameworks:**
C#, .NET Framework/.NET Core, ASP.NET MVC, PHP, GraphQL, HTML5, CSS3, Bootstrap, JavaScript, jQuery, Vue.js, Tailwind, SQL
- **Databases:**
Microsoft SQL Server, LINQ, Entity Framework.
- **Tools & Platforms:**
Git, Bitbucket, Docker, JIRA, Azure DevOps, MS Teams, Visual Studio.

WORK EXPERIENCE:

- **Networld Capital Ventures Inc (Software Architect)**
156 Jupiter, Makati City, Metro Manila | Sept 2024 – Present

Developed and maintained enterprise web applications and APIs using C#, ASP.NET, PHP, GraphQL, Vue.js and SQL Server.

Collaborated in Agile Scrum teams using JIRA and MS Teams.

Managed version control and deployment through Git and Bitbucket.

Designed modular, maintainable systems and implemented Docker for containerized deployments.

- **Collabera Technologies Private Limited Inc (.Net Developer)**

Ayala Avenue, Makati City | Jan 2023 – Sept 2024

Built and maintained web apps and web services using C#, ASP.NET, PHP, GraphQL, Vue.js SQL Server and Docker.

Integrated front-end interfaces with Blazor, JavaScript and JQuery.

Participated in Agile Scrum development cycles using JIRA and MS Teams.

Implemented CI/CD version control practices through Bitbucket and Git.

- **Pointwest Squad Inc (Applications Developer)**

Ayala Avenue, Makati City | Mar 2021 – Dec 2022

Developed and maintained Web APIs and Serverless APIs using C#, ASP.NET MVC.

Applied Dependency Injection principles for modular and maintainable code.

Used Azure DevOps for project tracking and version control.

Write unit testing with xUnit.

- **Macro8 IT Solutions OPC (.Net Developer)**

Two Ecomm Tower, Mall of Asia Complex, Pasay City | Jun 2019 – Apr 2021

Built and maintained web apps and web services using C#, ASP.NET, PHP, GraphQL, Vue.js SQL Server and Docker.

Integrated front-end interfaces with Blazor, JavaScript and JQuery.

Participated in Agile Scrum development cycles using JIRA and MS Teams.

Implemented CI/CD version control practices through Bitbucket and Git.

NOTABLE PROJECTS:

- **Project Name: CMS 2.0 (Claims Management System)**

- o **Technology:** PHP, GraphQL, HTML, CSS, Java Script, MSSQL Database, Git, Bitbucket

- **Role:** Fullstack Developer

- o **Status:** Up and running

Description: CMS 2.0 (Claims Management System) Developed a web application from scratch to support the internal claims team in approving, denying, or endorsing reported claims. Ensured the application runs on any browser and is fully deployed and operational for internal

agents. Worked as a fullstack developer, building new features and maintaining existing functionality: Frontend: HTML, CSS, JavaScript. Backend: PHP with GraphQL, Docker containerization .Database: MS SQL Server stored procedures. Participated in data fixes, bug resolution, and feature enhancements to ensure smooth production operations.

•**Project Name: GISTP (GI Straight-Through Processing)**

- o **Technology:** C#, .NET Framework, MVC Architecture, JSON, Angular JS, MSSQL Database, Git, Azure Repo

□ **Role:** Backend Developer

- o **Status:** Up and running

Description: GISTP (Straight-Through Processing)

Developed a web application from scratch to streamline insurance processing for authorized agents. Enabled agents to renew existing policies or create new quotations via a mobile-friendly interface. Initially launched with car insurance, expanded after a year to include property insurance renewals. Designed the system to support straight-through processing and planned future expansion to cover all insurance types. Contributed to backend development, ensuring scalable, reliable, and efficient processing.

•**Project Name: LEXA (LBC Express Application)**

- o **Technology:** C#, .NET Framework, MVC Architecture, JSON, React JS, MSSQL Database, Firebase

□ **Role:** Lead Backend Developer (Solo)

- o **Status:** Up and running

- o **Description: LEXA (LBC Express Application)** is Developed a mobile-friendly web application from scratch to enable customers to book package pickups from home or drop off at LBC branches. Implemented features for priority lane access using booking or QR codes, and a rewards system with promos and discounts. Acted as solo backend developer, responsible for: Designing and maintaining web APIs.

Creating new endpoints and updating existing ones. Handling file-based payloads (CSV) and JSON payloads. Collaborated with foreign frontend developers, ensuring seamless integration and smooth deployment.

EDUCATIONAL ATTAINMENT:

- **Tertiary:**

STI Academic Center- Caloocan, 109 Samson Road corner Caimito Street, Caloocan City
1400 Bachelor of Science in Computer Science, 2015 - 2019

- **Secondary:**

Malabon National High School, M. Naval St., HulongDuhad, Malabon City
Diploma, 2008 – 2012

- **Primary:**

Tonsuya Elementary School, Sanciango St., Tonsuya, Malabon City
Diploma, 2001 – 2008
